

SAT - 3KV (V2)

Isolation Transformer

Toroidal Isolation Power Conditioning provide the ultimate clean power performance

It isolates your hifi power from the dirty household electricity.

Input > output voltage ratio

Input / output voltage ratio is 1 to 1
 e.g. if input voltage is 225V, output voltage will be 225V too.

Step up or step down output voltage can be custom made per request

Suggested optimal power loading: Under 2000W

Though SAT-3KV(V2) can support a total 3000W power consumption. For a better performance, we always suggest the user to give some more buffer to the device.

Circuit Protection

The power switch is also a circuit breaker. When the breaker trips, the switch returns to its "off" position.

Placement & Ventilation

SAT-3KV(V2) is a very high-power device, and must be adequately cooled.

Place the SAT-3KV(V2) to a space with good ventilation.

If the space is lack of ventilation, additional forced air-cooling is highly recommended.

Technical Specification

Capacity: 3000VA
 Input Voltage: 200V - 235V
 Output Voltage: Same as input (Optional: 110V)
 Response Time: 15-20 mS
 Output Distortion: No distortion, the same as input waveform
 Protection: Circuit Breaker (15A)
 Frequency: 50Hz
 Efficiency: >98%
 Regulation: +/-1%
 Noise (Within 1 meter): <30dB
 Operating temperature: -10°C ~ 40°C
 Operating Relative Humidity: 20% ~ 85%
 Net Weight: 24 Kg
 Dimensions: (W)145mm (D)325mm (H)270mm

⚠ Important Safety Instructions

1. Read and follow Instructions—All safety and operating instructions should be read and followed before operating the device.
2. Water & Moisture—The device should never be used in, on or near water for risk of fatal shock.
3. Ventilation—The device should always be put in a place with proper ventilation. It should never be placed in a built-in installation or anywhere that may block the flow of air.
4. Heat—Never locate the device near heat sources such as radiators, floor registers, stoves or other heat-generating devices.
5. Periods Of Non-Use—The device should be unplugged when not being used for extended periods.

Power Makes the Difference
